PROFESSIONAL SUMMARY

Python Developer with 4+ years of experience building scalable backend systems using Django, Django REST Framework, PostgreSQL, Redis, and Celery. Experienced in designing REST APIs, optimizing database performance, implementing asynchronous processing, and deploying production applications with Docker and CI/CD. Strong understanding of software architecture, API security, cloud deployments, and writing clean, maintainable Python code.

EXPERIENCE

Senior Python Developer | Arbisoft

2021 – 2026

- Designed and maintained scalable Django applications serving production workloads across multiple business domains.
- Improved API response times by 30–70% through ORM optimization, PostgreSQL indexing, query tuning, and caching strategies.
- Architected asynchronous processing pipelines using Celery and Redis for bulk document generation, scheduled jobs, and reporting systems managing 1,000+ assets.
- Designed secure REST APIs with Django REST Framework, implementing JWT authentication, authorization, and third-party integrations.
- Built and maintained CI/CD pipelines using GitLab CI and GitHub Actions while containerizing applications with Docker for reliable deployments.
- Improved code quality through automated testing, code reviews, and development best practices, increasing automated test coverage beyond 60%.

SELECTED PROJECTS

FixAlert, Maintenance Platform • [Django + PostgreSQL](#)

- Optimized backend performance by eliminating N+1 queries and improving database access patterns.
- Implemented Celery-based background processing, Stripe payment integration, and scalable reporting services.

AskImam, Q&A Platform • [Django + DRF](#)

- Led migration from Django 2.x to Django 5.1 with minimal downtime and improved application stability.
- Implemented secure authentication, REST APIs, and administrative tools for content management.

Landit, Career Platform • [Django + React](#)

- Developed backend APIs and integrated business intelligence dashboards using Looker.
- Built transactional email workflows with SendGrid and optimized backend services.

Convo, Real-Time Chat Platform • [Django Channels + Redis](#) • [Personal Project](#)

- Built real-time messaging using Django Channels and Redis.
- Implemented JWT authentication, WebSocket communication, Docker deployment, and CI/CD automation.

CORE SKILLS

Languages: Python, SQL, JavaScript, TypeScript

Frameworks: Django, Django REST Framework, FastAPI, Flask, Scrapy

Backend: REST API Design, Celery, Django Channels, JWT Authentication, WebSockets

Databases: PostgreSQL, Redis, MySQL, MongoDB, Database Indexing, Query Optimization, Caching

Cloud & DevOps: AWS (RDS, S3, EC2), Docker, GitHub Actions, GitLab CI/CD, Jenkins, Nginx, Linux, Git

Testing: Pytest, Django Test Framework, Unit Testing, API Testing

Software Engineering: Object-Oriented Programming (OOP), Design Patterns, System Design, Performance Optimization, Code Review, Agile/Scrum

Integrations: Stripe, SendGrid, Google Analytics, Looker BI

Tools: VS Code, PyCharm, Postman, Redis, ESLint, Prettier

EDUCATION

B.S. Software Engineering Punjab University College of Information & Technology (PUCIT) • GPA: 3.08

CERTIFICATIONS

- The AI Engineer Path & Prompt Engineering for Web Developers — Scrimba (July 2026)
