PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience architecting and shipping responsive, high-performance web applications using React and Next.js. I prioritize fast renders, scalable component systems, and intuitive interfaces that hold up under product growth. I am comfortable owning UI architecture, rendering optimization, and design systems, and I thrive on partnering with cross-functional teams to deliver exceptional user experiences.

EXPERIENCE

Senior Frontend Engineer | Arbisoft

2021 – 2026

- Redesigned React frontend architecture, reducing unnecessary re-renders by 30% and improving page load times by 20-30% via memoization, code-splitting, and optimized state management.
- Elevated automated test coverage from 10% to over 60% (Jest, Cypress, Vitest) and integrated quality gates (ESLint, Husky), reducing production bugs by 25%.
- Led cross-functional framework migrations (Material UI v4 to v5, React Router v4 to v5) and architected reusable Storybook component libraries to ensure design consistency.
- Optimized developer workflows by streamlining GitLab CI/CD pipelines, significantly reducing frontend build failures and deployment times.
- Built custom data visualizations with Google Looker and designed scalable transactional email templates with SendGrid.
- Mentored junior engineers through regular code reviews and drove Agile feature delivery in tight collaboration with UX/UI designers and backend teams.

SELECTED PROJECTS

Landit, Career Platform · [React + Next.js + TypeScript](#)

- Executed zero-downtime frontend framework migrations (Material UI v4 to v5, React Router v4 to v5).
- Managed Storybook components and developed custom Looker BI visualizations for end-users.

FixAlert, Maintenance Platform · [React + Typescript](#)

- Revamped the UI of a computerized maintenance-management system in an Agile environment.
- Built reporting metric views and optimized frontend data fetching with React Query.

AskImam, Q&A Platform · [React + Vite](#)

- Added user-facing features to a high-traffic Q&A platform and integrated Google Analytics.
- Upgraded the frontend build stack to Vite, resolving major UI bugs and improving client stability.

Taiga — Arbisoft · [AngularJS + CoffeeScript](#)

- Designed and shipped the Requestor module (dynamic assignment, permission controls) and Feedback module (ratings, role-based access) within the ticket detail UI.

Convo, Real-Time Chat Platform · [React + WebSockets + TypeScript](#) · [Personal Project](#)

- Built a real-time chat single-page application using React, TypeScript, and Tailwind CSS.
- Integrated live messaging via WebSockets and implemented secure JWT authentication workflows.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, React Hook Form, Material UI, AngularJS

State & Data: Redux Toolkit, Context API, Tanstack Query, WebSockets, RESTful APIs

Testing & Quality: Jest, Cypress, Vitest, Storybook, ESLint, Prettier, Husky (pre-commit hooks)

Build & Tooling: Vite, Git, GitLab CI/CD, GitHub Actions, Docker

Integrations: Google Looker, SendGrid, Google Analytics

Practices: UI architecture, performance optimization, component design systems, responsive design, accessibility, code review, mentoring, Agile/Scrum, cross-functional collaboration

Frontend Engineering: Performance Profiling, Code Splitting, Lazy Loading, Accessibility (WCAG), Responsive Design, Component Architecture

AI/ML: Prompt Engineering, Context Engineering, Embeddings, Vector Databases, RAG, Vercel AI SDK

EDUCATION

B.S. Software Engineering Punjab University College of Information & Technology (PUCIT) · GPA: 3.08

CERTIFICATIONS

- The AI Engineer Path & Prompt Engineering for Web Developers — Scrimba (July 2026)
